Aspect Scoring Guide	
Impact Ranking	Controls Ranking
-3= High Impact. Potentially life threatening or life altering to humans or wildlife, or significant long term effects on the environment	+3= Very Effectively Controlled. Potential impact is highly unlikely to occur due to programs, processes or procedures in place
-2= Moderate Impact. Danger of non-life threatening health affects to humans or wildlife, or short term effects on the environment	+2= Moderately Controlled. Control substantially reduces the potential of impact from occurring through programs, processes or procedures
-1= Low Impact. Little impact to the environment and/or no danger to the health of humans or wildlife	+1= Slight Control. Control mechanisms can help limit the potential for impact or reduce the frequency or severity of impact
0 = No impact	0 = Uncontrolled. High probability exists for potential impact
NA = Not Applicable	NA = Not Applicable

Significant = aspect with a score of -2 or -3 in any impact category

Controlled = aspect with a score of 0 or higher in each significant impact category
